Mr. Edward B. King  
President  
Jumbo Mining Company  
6305 Fern Spring Cove  
Austin, Texas 78730

Dear Mr. King:

RE: Amendment Review, Mine Plan of Operations, UT-056-07P,  
Mizpah Pit Development and New Heap Leach Pad, Drum Mine

On September 17, 1991, BLM received supplemental information regarding your plan amendment for a new cyanide heap leach submitted March 29, 1991. Further technical information requested by BLM on April 17, 1991, consisted of (1) baseline hydrologic data, (2) proposed liner design, (3) leak detection system, (4) spill contingency plan, (5) neutralization plan, (6) monitoring plan. We have receive the above information along with plans for (7) a clay borrow pit and (8) a perched water table drain trench.

Due to a change of geologic personnel in this office, along with increased mining related activities, we were not able to complete our review of your plan amendment within a 30 day time period. As provided under 3809.1-6(a), we will require an additional 60 days to complete the review. A decision will be reached concerning your plan amendment prior to December 16, 1991. It is our intention to coordinate our review with the Utah Division of Oil, Gas, and Mining and the State Division of Water Quality.

We apologize for the delay and hope it will not interfere with your plans for construction and development. If you have any questions concerning this letter, please feel free to call Rody Cox or me at (801) 743-6811.

Sincerely,

SIGNED

Rex Rowley  
Area Manager
